

NetApp for Financial Services

10 GOOD REASONS

01 LEADING VENDOR

9 of the 10 biggest US banks and 900 leading financial services firms worldwide rely on NetApp

900

03 ESTATE-WIDE INSTRUMENTATION

Know where your data is and how it moves, understand, plan and drive your infrastructure from one toolset allowing intelligent automation, charge-back of costs, and faster incident management

05 REDUCED IT COSTS

A known infrastructure estate that is automated to provide resilient Platform-as-a-Service, is more efficient and cost-effective to run whether in-house or through a managed service

07 RAPID SERVICE PROVISIONING

Allowing your company to focus on delivering the promised data services and applications that provide customer value

09 ACCELERATE SOFTWARE DEVELOPMENT

Data tools automate and speed configuration management, CI and CD while enterprise-scale analytics enables apps to better target profits

01

02

02 COMPLIANCE

Meets SEC 17a-4 for immutable storage, and can be implemented as part of a FIPS or PCI-DSS compliant stack

03

04

04 OPERATIONAL SIMPLICITY

The same processes and interface for all your company's data, on-premises or in the cloud, simplifies data management tasks and reduces operational risk of inadvertent breach

05

06

06 NEXT-GEN DATA CENTER

Programmable, automated, and efficient stacks turn data centers into clouds, providing Infrastructure-, Platform- and IT-as-a-Service

07

08

08 GUIDANCE TO THE CLOUD

Software and services facilitate the adopting of a multi-cloud approach to IT, offering flexibility to place data and workloads in the right place at the right time

09

10

10 MACHINE LEARNING AND RISK REPORTING

Pre-engineered stacks can include GPUs, giving you the floating-point power to run machine learning, AI, regulatory and risk compliance calculations
